Master Distribution Services Covid 19 Coronavirus Update.

Master Distribution Services have been working hard improving fill rates on the top requested SKU's. However there has been an increase in notifications from our suppliers.

Rubbermaid Commercial Canada, Globe Commercial Products and others that have product or components that make up products that are sourced for China and other effected countries may have disruptions in the supply chain for the near future.

Along with plastics we have also received notice for the manufactures we inventory disinfectant wipes and liquid products we will be put on manual allocations based on our order patterns. We will experience back orders and/or delays on all of these products.

The situation with the Coronavirus in China and around the world is changing daily. We will continue to keep you fully apprised of any further business implications that will affect our ability to service you and your customers.

Thank You for your continued support and understanding.

Sincerely,

David Hay

President
